

Did you know that one deer can feed 200 hungry people?

Chances are you are not going to bed hungry. The sad thing is one in five children in America goes to bed each night with a hungry belly. Even mildly undernourished children may suffer abnormal physical, emotional, and spiritual damage. The impact of childhood hunger can be lifelong. How can this be in a nation that has been blessed with so much ?

Patty Pollatos Fund, Inc (PPF) Local Representative
